10:00 am-2:00 pm

Where: Newlands Golf and Country Club
21025-48th Avenue, Langley

For further information email
naoshawardsforum@worksafebc.com

What's wrong with this photo?

When you're committed to workplace injury prevention, a picture is worth a thousand words. In fact, depending on the intended message, a photo can speak volumes about how to work safely – or unsafely.

As part of our responsibility to demonstrate safe work practices, we scrutinize every photo we publish. Based on feedback we receive from readers, we know you're equally vigilant. We regularly get comments pointing out a potential hazard that's been overlooked in one of our photos, so, once again, we've decided to give you the chance to share your expertise – for everyone's benefit.

The photo above has been deliberately staged to display at least half a dozen dangerous work habits. We're inviting you – as dedicated employers and health and safety professionals – to tell us how many hazards you spot; and then email your responses to Dana.TyeRally@worksafebc.com by September 21, 2011. Please include your full name, work title, workplace, and workplace location.

We'll publish as many responses as we can, and one lucky respondent will win a prize. Ultimately, we hope this exercise reminds everyone to use the same laser-eyed precision in creating their own injury-free work spaces.

About this pullout poster

We first launched “What’s wrong with this photo?” in the September/October 2009 issue of *WorkSafe Magazine* – and haven’t looked back. The interest in our spot-the-hazards photo feature grows daily. The minute the magazine hits the stands and gets posted online, readers from all over the world – and from every walk of life – begin sending in emails, each containing unique interpretations of the safety offences shown in the photo. Each photo generates about 150 entries.

In response to your enthusiasm, we thought we’d make things a little easier. The poster on the opposing page offers a larger, more detailed look at the photo in question, and the option to remove the page if you’d like – sharing it with co-workers on a workplace wall or bulletin board, or laminating it for longer term use as a group safety exercise or individual workplace contest.

And if you like what you see, we encourage you to visit our website at WorkSafeMagazine.com. While you’re perusing past issues, you’ll be able to easily locate “What’s wrong with this photo?” from the table of contents, and view coverage of previous topics, such as woodworking safety, fall protection, forklift safety, confined spaces, nursery safety, health care ergonomics, scaffolding safety, excavations, and many more. If you’re planning to reprint or redistribute this feature for workplace educational purposes, and would like to find out more about the magazine’s copyright policy, please contact Dana.TyeRally@worksafebc.com.

In the meantime, open the flap to enter this month’s “What’s wrong with this photo?” contest!

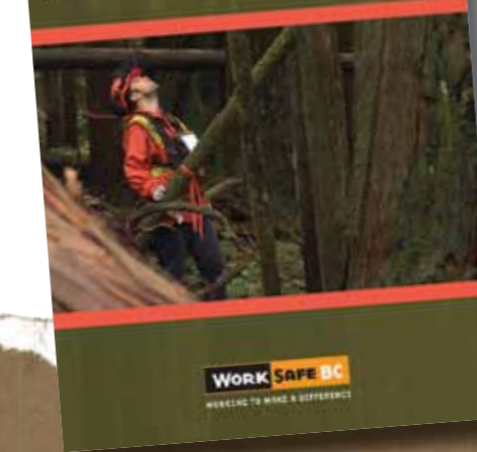

Check out WorkSafeMagazine.com to see examples of “What’s wrong with this photo?” from previous issues, with opportunities to spot the hazards in excavations, confined spaces, and chemical exposure sites.

New DVD Available!

Faller Safety

It's everyone's responsibility

Faller Safety

It's everyone's responsibility

A lack of planning and adequate supervision, and the failure to recognize, evaluate, and control hazards — any or all of these can contribute to faller fatalities and serious injuries.

This video shows what can happen to a faller in today's industry, and how everyone is responsible for faller safety.

Stream, download, or purchase this video at WorkSafeBC.com.

WORKING TO MAKE A DIFFERENCE

Fraud costs everyone

Everyone has a stake in fighting workers' compensation fraud because we all end up paying the costs.

WorkSafeBC doesn't take fraud lightly and neither should you.

If you suspect an individual or company of committing fraud, call WorkSafeBC's Field Investigations Department toll-free at 1 877 523-3315 to make a confidential report, or email fraudinfo@worksafebc.com.

For more information, including examples of workers' compensation fraud, visit our website at www.worksafebc.com/contact_us/fraud/default.asp.
