Update 2003 – 5

TO: HOLDERS OF THE *PREVENTION MANUAL*

This update of the *Prevention Manual* contains amendments implemented since update 2003 – 4.

The update contains new policy item R5.48-1 (Chemical and Biological Substances – Exposure Limits and Designations) to implement amendments to the *Occupational Health and Safety Regulation* pertaining to occupational exposure limits, effective October 29, 2003.

This update also includes additions to Appendix 1 – Index of Retired Decisions from Volumes 1 – 6 (Decisions No. 1 – 423) of the *Workers' Compensation Reporter*. Appendix 1 has been updated to reflect the retirement from policy status of 81 Decisions, effective October 21, 2003.

If you have any questions regarding subscription information for updates to the *Prevention Manual*, please call WCB Customer Service provided by Benwell Atkins/Moore at 1-866-271-4879.

APPENDICES

APPENDIX 1

Index of Retired Decisions from Volumes 1 - 6 (Decisions No. 1 - 423) of the Workers' Compensation Reporter

**RE: Chemical and Biological Substances -
Exposure Limits and Designations****ITEM: R5.48-1**

BACKGROUND

1. Explanatory Notes

Section 5.48 provides established limits for a worker's exposure to hazardous chemical substances. Generally, these exposure limits are established according to the Threshold Limit Values adopted by the American Conference of Governmental Industrial Hygienists. However, the Board has authority to make exceptions and adopt occupational exposure limits for specific chemical substances that are not consistent with the Threshold Limit Values established by the American Conference of Governmental Industrial Hygienists.

2. The Regulation

Section 5.48:

Except as otherwise determined by the board, the employer must ensure that no worker is exposed to a substance that exceeds the ceiling limit, short-term exposure limit, or 8-hour TWA limit prescribed by ACGIH.

Section 5.57:

- (1) If a substance identified in ACGIH or IARC by any of the following notations, abbreviations, or endnotes is present in the workplace, the employer must replace it, if practicable, with a material which reduces the risk to workers:
 - (a) ACGIH A1 or A2, or IARC 1, 2A or 2B carcinogen,
 - (b) reproductive critical effects,
 - (c) sensitization critical effect or SEN notation, or
 - (d) L endnote.
- (2) If it is not practicable to substitute a material which reduces the risk to workers, in accordance with subsection (1), the employer must implement an exposure control plan to maintain workers' exposure as low as reasonably achievable below the exposure limit established under section 5.48.

3. Preamble to Policy

The following is a preamble to be applied to those exposure limits developed by the Board as an exception to the Threshold Limit Values established by the American Conference of Governmental Industrial Hygienists:

An exposure level is a maximum allowed airborne concentration and is not intended to represent a fine line between safe and harmful conditions. In determining an exposure limit, it is not possible to take into account all factors that could influence the effect that exposure to the substance may have on an individual worker. Therefore, for all hazardous substances, regardless of any assigned exposure limit, the guiding principle is elimination of exposure or reduction to the lowest level that is reasonably achievable below the exposure limit.

Due to a wide variation in individual susceptibility, some workers may experience discomfort from some substances at concentrations at or below the exposure level. Others may be affected more seriously by aggravation of a pre-existing condition, or by development of an occupational disease. Furthermore, other workplace contaminants may affect an individual's response. The effects of combined chemical exposures are often unknown or poorly defined.

POLICY

As presented in the table below, the Board has determined exposure limits for specific substances, notwithstanding the Threshold Limit Values established by the American Conference of Governmental Industrial Hygienists.

HISTORY:	
APPLICATION:	Item developed to implement the amendments made to the <i>Occupational Health and Safety Regulation</i> , effective October 29, 2003 pertaining to occupational exposure limits.

APPENDIX 1**INDEX OF RETIRED DECISIONS FROM
VOLUMES 1 – 6 (DECISIONS NO. 1 – 423) OF THE
*WORKERS' COMPENSATION REPORTER*****EXPLANATORY NOTE:**

The Board of Directors Bylaw re: Policies of the Board of Directors lists the policy manuals and other documents that are policies for purposes of the *Workers Compensation Act*. Included in the list are Decisions No. 1 – 423 in volumes 1 – 6 of the *Workers' Compensation Reporter*. These Decisions consist, for the most part, of decisions made by the former commissioners on various matters between 1973 and 1991.

In order to reduce the number of sources of policies, a strategy has been approved for consolidating Decisions No. 1 – 423 into the various policy manuals, as appropriate, and “retiring” the Decisions over time.

“Retire” for this purpose means that, as of the “retirement date”, the Decision is no longer current policy under the Board of Directors Bylaw.

“Retiring” does not affect a Decision’s status as policy prior to the date it was “retired”. A “retired” Decision therefore applies in decision-making on historical issues to the extent it was applicable prior to the “retirement date”. “Retiring” also does not affect the disposition of any individual matters dealt with in a Decision.

This Index sets out the Decisions from volumes 1 - 6 that have been “retired” and the “retirement date”. It will be updated as further Decisions are “retired” in the future.¹

¹ Decisions that do not appear in the Index should not necessarily be considered current policy. Decisions or parts of Decisions may have been replaced, either expressly or impliedly, by subsequent policies in the policy manuals or other policy documents. Under the Board of Directors Bylaw, where there is a conflict between policy in Decisions No. 1 - 423 and policy in a policy manual listed in the Bylaw, the policy in the manual is paramount. In the event of any other conflict between policies, the most recently approved policy is paramount.
