

**Overview of proposed amendments to
Part 20, Construction, Excavation and Demolition
Section 20.102, Suspended work platforms**

The proposed amendment is consequential to the regulatory amendment to s.13.27, effective January 1, 2005, to address the concern raised by the marine and pile driving industry at the 2004 public hearing that the newly amended section 13.27 requires the use of two cranes for activities historically completed with one crane.
