

Overview of proposed amendments to

Part 11, Fall Protection – Section 11.6, Anchors

**Part 13, Ladders, Scaffolds and Temporary Work Platforms –
Section 13.33, Fall protection**

The proposed amendment clarifies the intent of existing fall protection requirements which came into effect January 1, 2005 by revising the application of the requirement to include personal fall protection systems. As well, the requirements for a temporary fall arrest system and a permanent anchor have been placed in separate subsections. A consequential amendment to section 13.33 (1) is required to reflect this change.
