Worksafe BC
6951 Westminster Highway,
Richmond, BC V7C 1C6

Attention: Ms. Anne Burch, Director, Policy and Review Division

Dear Ms. Burch:

As per Grant McMillan's letter dated April 25, 2006 we have concerns and a real interest in your proposed Part 18 – Traffic Control.

We do a lot of what we would class as low hazard control, moving concrete and gravel trucks, mobile cranes, etc. on and off secondary roads onto our construction sites and feel comfortable with the basic training regarding traffic control we have in place with our employees.

We have to use many employees over the course of a month to complete this task and to use trained traffic control persons for the work would not be practical as their work on most jobsites is intermittent work where these employees have to have other skills to complete work when traffic control is not required.

We believe that the system we are using at this time is working well. To do what is contemplated would only add cost and complexity to our work without enhancing our safety program.

We thank you for consideration of our thoughts regarding this matter.

Yours truly,

CAMPBELL CONSTRUCTION LTD.
