Submission:

I was lucky enough to have had some one on one time with teh panel in Prince George, They were very imformative. However I still disagree with teh explanations given regarding the proposed changes. i do not feel comfortable with the fact that at first glance of some of the new language it appears that Worksafe is encouraging not to use TCP's but rather more signs and other devices to control traffic. This I would hope is not the case, after working so hard in conjunction with the safety network to impose a guild line of training for all TCP in BC. That in my opinion has encouraged the use of qualified TCP's. In closing I agree with adding part 8 to part 18 however as for the remainder of the proposal I see no real need fro it.
