Submission:

As an rn I am disappointed that my employer has already chosen the cheapest device which I feel shows the lack of concern and value it has for the front line care givers who risk their health on a daily basis to provide care to their patients not CLIENTS! Decisions made affecting my safety should at the very least include my input. The nurses union in bc have been raising the need for a needleless system to the health authorities for some time. Jan 2008 is too long. How many nurses will pay the price?
