

Your submission has been received.

Submission ID: P08.556.0S2.KDZ

Part 9, Section 9.11

Sector: 7040 - Primary Resources, Oil & Gas or Mineral Resources

Name: Boyd Sellar
Title: Corporate Safety Manager
Type: Worker for large employer
Organization: PTI Group Inc.

Submission:

We agree, for the most part, with the proposed changes to this regulation.

We have concern with one particular part of the proposed changes, that being the "qualified persons" referred to in several sections of the regulation.

We note that there are several Canadian safety professional designations that are not listed under the qualified persons description.

Rather than list specific professional designations, you should reference specific training required to safely perform the the required confined spaces work. Confined space entry is a specialized area of expertise that is not covered in great detail through ANY safety professional course, certificate or designation review program. It takes a blend of training and job experience to safely perform these tasks.

Our confined space experts are journeymen trades staff who have been given competent outsourced training on hazard assessment and controls, confined space entry, atmospheric testing, etc.

Q: The proposed change is easy to understand

A: Agree

Q: The reasons given in the explanatory notes to support this change are relevant

A: Neutral

Q: The proposed change will have a direct effect on the work carried out at my workplace

A: Disagree

Q: The proposed change will have a positive impact on the health or safety at my workplace

A: Neutral

Q: I support the proposal

A: Agree

Q: I will participate in the regulatory review on-line process in
future
A: Agree
