Submission:

I think it is important to have the safest devices on the market available to use as soon as possible. I had a needle sick injury and the patient refused to be tested for diseases. The next 6 months were so awful wondering if I had contracted a disease that I could transmit to my family. It was life on the edge for no reason. I'm not sure if I understand everything in this document I just want to voice my oppinion that the change will be too slow in coming!
