Subject: Proposed WoreSafeBC training regulation

Please accept this submission for consideration to the proposed WorkSafeBC training regulation.

Comments on the proposed regulations:

- National Concrete Accessories supports the training of new workers. Safety is of primary consideration in our business.
- National Concrete Accessories supports the documentation of initial training. It is a check and balance on the employee and the employer.
- National Concrete Accessories opposes the proposed documentation requirements. It is important that documentation occur, but, a more reasonable amount is in order.

Regards,
Bradley Fenn
BC Regional Manager
