Subject: Firtst aid amendments

W1048

Proposed amendments to OH&S requirements

Page 23 of the draft

Recommendations for dressing stations

Please omit

1 nail brush

1 100 ml liquid adhesive tape remover

1 7.5 cm x 4.5 m adhesive crepe bandage

These also appear on page 25 & 26 under additional recommendations for first aid rooms. In the 14 years I have been an OFA level three attendant I have never seen or heard of the adhesive crepe bandage or tape remover used. A nail brush is actually not to be used because of the chance of it promoting bleeding.

Respectfully,

Lorne Gosick
HR Manager
