Attention: OR1 and OR2 Providers

Subject: Update on using the Lite Program

As we all settle into this new hybrid model of service delivery, many providers have been able to gradually increase the amount of in-person care they can provide to injured workers. As a result of this, it may be appropriate in certain circumstances to request using the OR1 or OR2 Lite Program for gradual entry to the program, or to manage potential flare-ups during the program. If it is considered to be of clinical benefit for the injured worker, please discuss your recommendation with the Claim Owner for approval to start the Lite Program.

Thank you for your continued care to injured workers at this time.
