**Attention: Cognitive Functional Capacity Evaluation
(Cognitive FCE) Providers**

Subject: Complexity Fee Code

We would like to take this opportunity to welcome you to the network, we are excited to be formally offering Cognitive FCE's to injured workers at this time.

In consideration of complex files that request an analysis of greater than three job prospects, providers may request a *Complex FCE review*. If approved, this will allow an uplift fee known as the Complexity Fee (fee code 1252358) to be invoiced.

Providers must obtain approval from the Program Manager or Quality Assurance Supervisor in Health Care Programs prior to invoicing the complexity fee. A brief summary of factors contributing to the complexity of the FCE, as well as a list of occupations which will be analyzed are required for consideration. Please use the [Complex FCE Request Form](#) to summarize this information and email it to the addresses provided below.

Providers should be aware that this uplift fee can only be requested for Cognitive FCE's requiring analysis of greater than three jobs, and a separate analysis or job match chart must be provided for each job.
