

Glove removal procedure

To protect yourself from exposure to contamination, you must take your gloves off safely.

How to remove gloves safely

1. With both hands gloved, grasp the outside of one glove at the top of your wrist.

2. Peel off this first glove, peeling away from your body and from wrist to fingertips, turning the glove inside out.

3. Hold the glove you just removed in your gloved hand.

4. With your ungloved hand, peel off the second glove by inserting your fingers inside the glove at the top of your wrist.

5. Turn the second glove inside out while tilting it away from your body, leaving the first glove inside the second.

6. Dispose of the gloves following safe work procedures. **Do not reuse the gloves.**

7. Wash your hands thoroughly with soap and water as soon as possible after removing the gloves and before touching any objects or surfaces.
